MY GLACIER IS THE
GREATEST!

BUT LIVING ON A GLACIER IS NOT ALL ABOUT FUN.

WE ALSO HAVE TO TAKE CARE OF THE ICE allowing it to remain "eternal". 40 years ago, B.BIG and I could still sledge all the way down to the Dresdner Hütte in the middle of summer! That's why the people from the Glacier Cable Cars in 2004 started to cover up large areas of ice here with fleece mats, which you can see everywhere. In total, we roll out 7 hectares of white mats, a 5 mm thick material, covering the glacier. This stops it from melting, and even helps it to grow.

WHICH MATERIAL IS USED TO COVER THE STUBAI GLACIER?

- I**₀₂ Fleece
- A**₀₂ Net lace
- D**₀₂ Felt

I have lived up here on the Stubai Glacier for over a century. But even though I'm always surrounded by ice, I'm still amazed by it. On the one hand, there are the inclusions in the glacier ice itself, on the other there's its incredible age. After all, compared to the gravel or spores you can see with a microscope, I'm a real spring chicken. See what you can discover yourself!

WHAT CAN YOU SEE IN THE ICE?

(the correct answers are then used as letters 05 and 06 in the solution)

- R** BUBBLES
- O** APPLE
- W** BALL
- A** GRAVEL

HOW MANY ENCLOSURES DID YOU SEE?

EN

ICE CHALLENGE THROUGH B.BIG'S ICE GROTTO

MY GLACIER WORLD
bigfamilystubai.at

Come in!

MY ICE GROTTO

FROZEN TREASURE

What is available in abundance on the Stubai Glacier and can often be enjoyed on a stick or in a cup?

- O**₀₃ Cheese
- S**₀₃ Ice
- R**₀₃ Rocks

GO TO THE ICE THRONE!

From the Eisgrat, the path leads to my ice grotto. Do you know what you can spot along the way? Do you see the fascinating glacier phenomena? Imagine, for example, how many years it took for the ice to release the stones. Too many to count!

Step into my home, which lies an impressive 30 metres below the surface. Here you can see what nature reveals about the glacier. With inclusions in the glacier ice and all the different layers, I'm sure you'll be amazed...

THE TALL ICE THRONE IS A TRULY ROYAL PLACE. I LIKE TO HIDE BEHIND IT AND STASH CLUES. CAN YOU FIND MY NOTE?

WRITE THE LETTERS HERE:

B.GIANT, THE LITTLE BIG MAMMOTH

A truly amazing new arrival, which takes you straight back to the ice age, awaits you at the Gamsgarten mountain station. Get ready to greet a six-metre-high, over seven-metre-long wooden mammoth. In winter, this special photo opportunity is an absolute must! Take a souvenir photo with this prehistoric giant and send it to your friends as a cool greeting from the eternal ice. But be sure to visit the mammoth in summer, too! In summer, B.GIANT travels up to the Eisgrat and turns into a great playground, perfect for little explorers to climb, slide and play on!

HOW BIG IS THE MAMMOTH?

- T**₀₇ 6 Metres
- A**₀₇ 70 Centimetres
- K**₀₇ 3,120 Metres

B.BIG's NEW CLOTHES

Every morning, I ask myself the same question, "What should I wear?" But that's enough pondering! I'll let you decide now. Turn the three-piece statue of me in the ice grotto or simply put together an outfit for me here. Which of the many options will you go for?
